DESCRIPTION

. Doesn't regularly use a computer. Has an iPhone, but doesn't use very much of its functionality.

. Doesn't use the register himself, but was around to weigh in when Yonah was first putting together the family artefacts for the register and is generally around to weigh in whenever Manah is adding an anecdote to an artefact on the register - is a secondary user at this point.

. Tasks: N/A (unless his being in discussion with Manah as she edits the register and offering stories/events for Manah to add to the register counts as a task?)
